Abstract

Using the S.-C. Fang, J.R. Rajasekera and H.-S.J. Tsao results [4], we extend the unconstrained convex programming approach to solving standard-form linear programs with weighted entropic perturbation.

AMS Subject Classification: 90C05, 90C25, 94A17.

Keywords: linear programming, entropic perturbation, geometric dual program, duality theorems, ε -optimal solution.
