

Information for Authors

Submission of the paper to this journal will be taken to imply that it contains original work not already copyrighted, published or considered for publication, in part or in full, and that, if accepted for publication in this journal, it will not be published elsewhere in the same or a similar form, in any language, without the written consent of the University of Bucharest.

Each paper requires a short abstract summarizing the significant content and findings, the MSC 2010 classifications and the key words and phrases.

References should appear within the text between brackets, the full list should be collected and typed at the end of the paper in alphabetical order, according to the abbreviations of Mathematical Reviews.

Submissions should include the authors' complete names, with the family name in capital letters and first names in lowercase letters.

The review process

1. The manuscripts should be sent to one of the editors (the one which the author considers to be closest to the topic of the manuscript). Alternatively, the manuscripts can be sent to one of the Editorial Secretaries.

2. The manuscripts received by the Editorial Secretariat will be assigned to one of the editors which represent the submission's area.

3. Every accepted manuscript is communicated by one of the editors and will be published with the mention '*Communicated by...*'. This means that the editor who communicates the paper is responsible for the correctness and the originality of the article.

4. The Editor who communicates an article may, if deemed necessary, to request before the communication reports of specialists from the country or abroad.
