

JULY 2003

WELCOME TO THE PEARSON/ ROMANIA EDUCATIONAL PROGRAM

This is the first step of a dynamic program to assist Lecturers in Romania to use world renown English text books and to include Romanian students in the global student community.

Pearson Education is the largest academic publisher in the world as well as publishing books for computer practitioners and FT business (Financial Times) books for professionals.

We recently evaluated our business in your area and have decided to implement the following program which I believe that you will find very interesting for your professional requirements.

1. Complimentary copies of our books for course consideration (we need your name + email + name of the course (s) + number of students + book in use even if it is local language. Once we input this information into our data-base you will begin to receive sample copies.
2. Once you decide to use our book, please advise the bookshop (name of participating bookshops available on request) and when you have placed an order for the book, I will be happy to send you the supplementary materials (power points transparencies, solutions manuals, instructors manual, etc where available) and web access information.
3. We expect that 20-50% of your students will want to purchase a course book. Our participating bookshops will be happy to stock books for your students.
4. Since your name will be in the database, you will receive (complimentary) copies of any new books published in your area of interest.
5. Pricing: we have reduced the price of our academic books for your market. We now allow our local bookshops to set the retail price for the books, but generally they should be around \$40.00 or less (Including delivery and VAT). This is an excellent price, and this is an excellent program.

We hope that you will want to join us in this new academic endeavour and if you have thought about changing your book to an English book, then this is the perfect opportunity to do that. All of the advantages are there for you: excellent products, superior supplementary and web materials, and the best prices in Europe. Additionally, it is the opportunity for your students to use the same books used at major universities all over the world and to become a part of the global student community.

I look forward to hearing from you, WARM REGARDS
ANDREA SHUSTARICH - PEARSON EDUCATION
