

TDNet

Electronic Journals Management

L

Electronic Journals on the Net

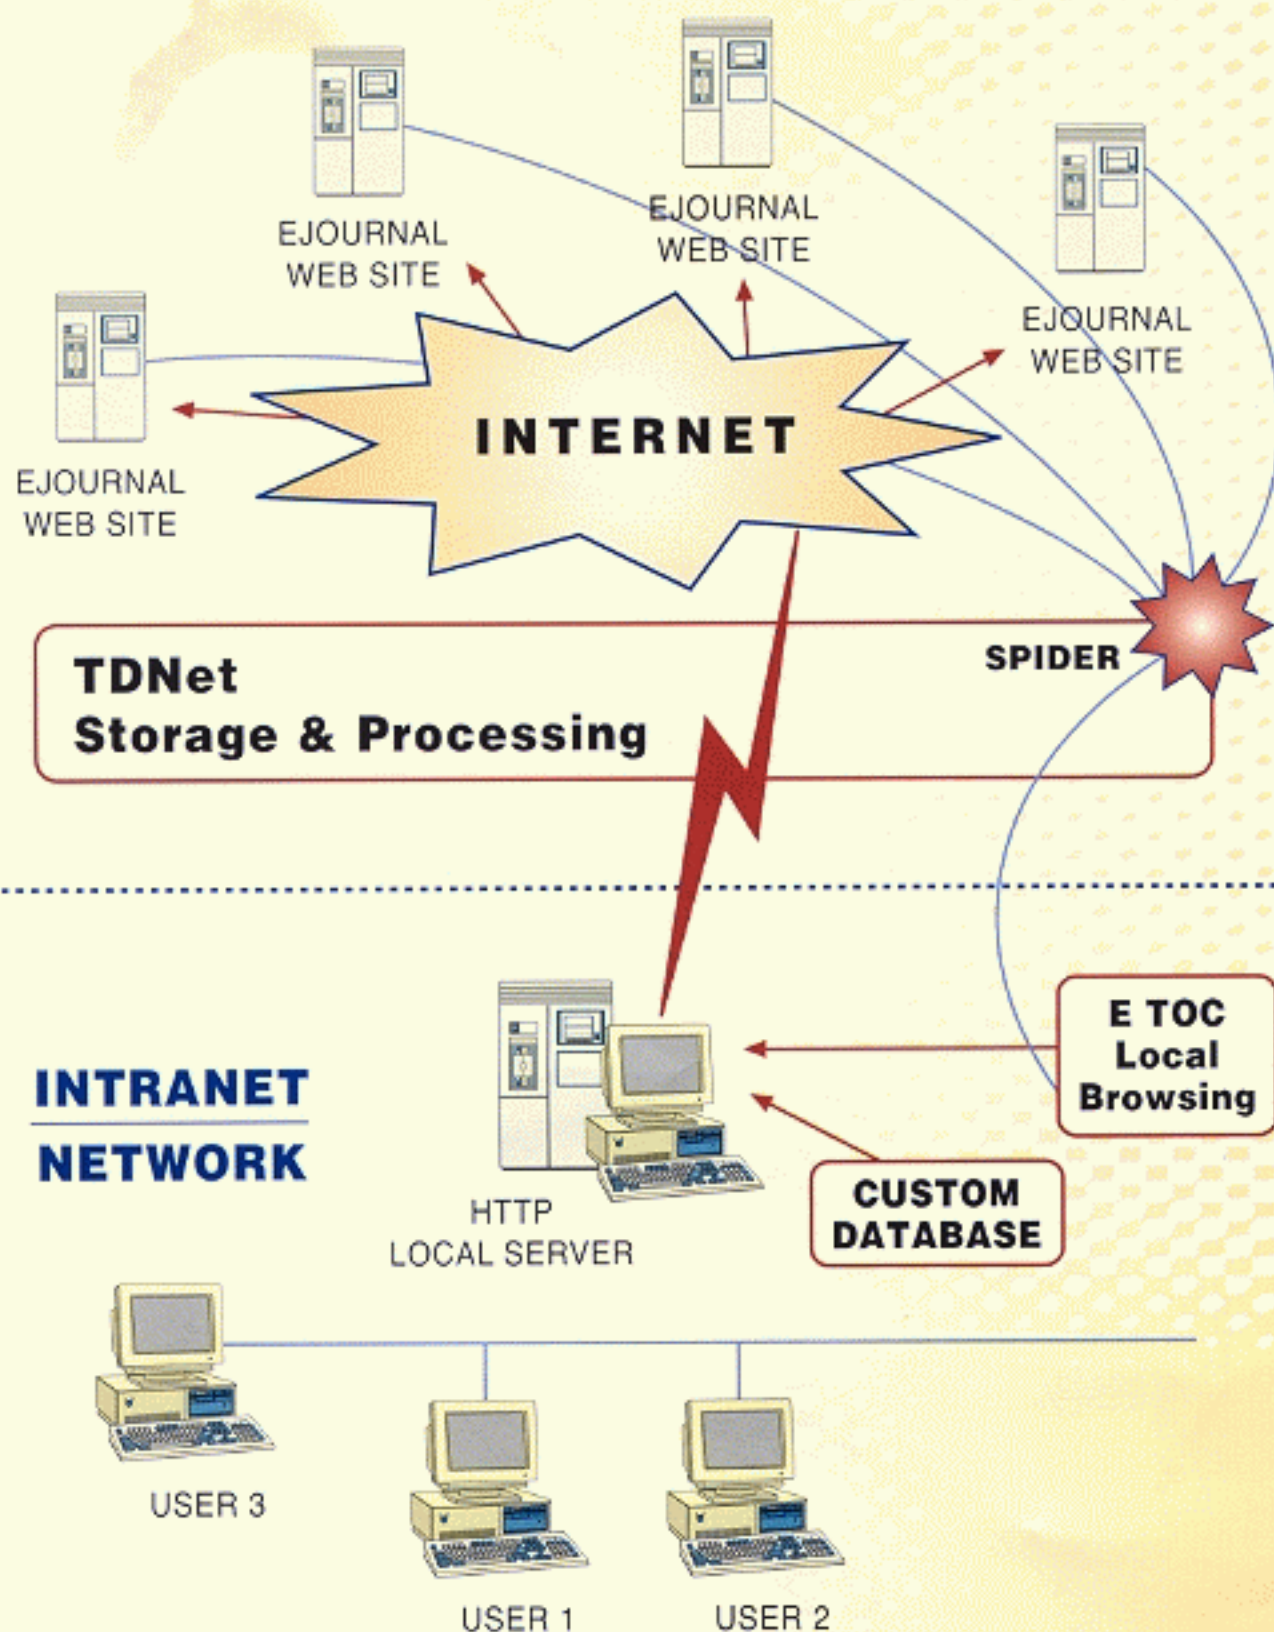

Linking you to the World Wide Web of E-Journals

A perfect solution for Academic, Medical, Government & Hi-Tech libraries.

TDNet

TDNet's unique solution to electronic journals management is based on an original approach integrating a diversity of access modes to electronic journals, on one unified, coherent site.

TDNet - A custom-made Intranet Electronic Journals System

TDNet Advantages:

■ A Time Saving Service:

- We trace e-journal sites on the internet
- We link e-journals, wherever hosted, directly to your home page
- We provide access & availability information
- We automatically update and maintain your e-journals site

■ A One-Stop E-Journal Management Tool:

- All e-journal titles displayed coherently in one site
- A one-stop e-journal site for patrons, users and visitors
- Seamless links to various local & remote locations and to different in-house systems

TDNet Features:

■ Wide universal access to electronic titles:

- Links to remote sites on the internet
- Links to journals in every country, from every publisher, in every language
- Links to titles hosted on local or shared servers

■ A custom-made E-Journal Service:

- Including all and only your titles
- Providing current access information to every user
- Unlimited access and redistribution rights throughout the organization
- Linking E-journals to OPACs and library automation systems
- Other custom features are available per request

■ Entering subscriptions to electronic journals:

- Obtaining passwords and licenses
- Payments to publishers
- Management of orders

■ Local Storage & Intranet Searching

fast, easy and free of remote communication problems.

TDNet Modules:

■ WWW direct links:

- Links to e-journal sites
- Links to the full text of free and paid for electronic journals
- Links to Publishers homepages.
- Links to archives of past issues of the journal.

■ Access validation for each title:

- Information on free and for-fee full-text access
- Custom linking of each title according to current access arrangements
- Obtaining new access rights
- Providing passwords where applicable

■ Searching & updating your e-journal site:

- Current tables of contents (ETOCs) updates
- Full search capabilities, by:
 - Article title, author, publisher, journal title, volume, issue, ISSN etc.
- Constant maintenance of site:
 - Updating changing URLs
 - Adding/deleting titles
 - Updating access information & current access rights

■ TDNet Alerts:

Users can easily build their own alert services to receive:

- notices on new issues
- pushed tables of contents from selected titles
- profiles per topics of choice

■ Commercial Publishers Electronic Projects

We link titles from every publisher and all major electronic projects, including:

- Elsevier Science Publishers
- Springer Verlag
- Academic Press
- Kluwer
- Cambridge Scientific Abstracts
- Wiley
- MCB
- and many more.

TDNet provides a complete print & electronic service and handles both remote access links to journal sites as well as negotiating site license agreements for institutions and consortia.
