

# Contents

1	Navier-Stokes equation with hereditary viscosity <i>Viorel BARBU, S.S. SRITHARAN</i>	1
2	Entropy of countable probability distributions <i>Costel M. BĂLCĂU</i>	15
3	Least-squares and Quasi-Newton-Goldstein algorithm to solve Navier-Stokes equations <i>Cătălin Liviu BICHIŢ</i>	25
4	A new proof of the existence of weak solutions for the equations of magneto-hydrodynamics <i>Adrian CARABINEANU, Mihai GAVRILESCU</i>	31
5	The relationship between the Frattini $p$ -ideal and the Frattini ideal for a $p$ -Lie algebra <i>Camelia CIOBANU</i>	43
6	Domains of attraction for a model in enzymology <i>Rodica CURTU, Adelina GEORGESCU</i>	49
7	Optimal assignment of slack due dates in a new product development situation <i>Andreea Bogdana DRĂGUŢ</i>	59
8	Hyperedge replacement grammars <i>Silvia DUMITRESCU, Bogdana POP</i>	69
9	Model checking safety-critical systems <i>George ELEFThERAKIS, Petros KEFALAS</i>	77
10	Funcții $(s)$ -monotone și $(\rho\tau)$ -continue <i>M. GAVRILĂ</i>	87
11	Aspecte topologice și diferențiale ale imaginii în recunoașterea obiectelor 3D <i>Constantin GEORGESCU, Eugen DIACONESCU</i>	95
12	A theorem on the fractal dimension of the attractor of a semigroup of non-differentiable operators <i>Anca-Veronica ION</i>	107

iv		
13	A theory of testing for X-machines <i>Florentin IPATE</i>	115
14	Branching equation truncation reduction under group symmetry condition <i>B.V. LOGINOV, I.V. KONOPLEVA</i>	121
15	Canonical topologies on an ordered set <i>Emil MOLDOVEANU</i>	127
16	O condiție suficientă de echivalență a germenilor de funcții netede <i>Mihnea MOROIANU</i>	137
17	Simulation of constrained mechanical systems and inverse problems <i>R.G. MUHARLIAMOV</i>	143
18	A characterisation of morphisms between two harmonic spaces <i>Emil POPESCU</i>	151
19	Differential operators that divide the wave operator. Elementary solutions <i>Ovidiu Ilie ȘANDRU</i>	155
20	On polynomials with zeros outside the unit disk <i>Katsuo TAKANO</i>	161
21	Conjugated non linear operators <i>Corneliu UDREA</i>	169
22	Static bifurcation diagram for a mathematical model governing the capital of a firm <i>Laura UNGUREANU, Adelina GEORGESCU</i>	177
23	Polynomial-exponential equations modulo $p$ <i>Cristian COBELI, Marian VÂJĂȚITU, Alexandru ZAHARESCU</i>	183
24	Estimations of the blow-up time in a nonlinear nonlocal problem modelling Ohmic Heating <i>Panayiotis M. VLAMOS</i>	189
